

Pax Arcadian Stat Lists

Army Traits and Special Rules:

Moridian Launcher / Black Gnat Missile

To Fire the Black Gnat Missile:

Activate the Moridian Launcher formation as normal.

Nominate a target for each launcher firing this turn individually, which will be the centre of the strafe template attack.

The Black Gnat is artillery, so does not need line of site to target. Unlike most artillery, the missile is guided during flight, so never deviates.

Roll a training test (3+). If passed, place the template as you wish with any alignment over the target.

If failed, the pilot has misjudged their attack vector. Roll a D10 and use the point of the die to determine the angle of attack in the same manner as you do with deviation. Rotate the strafe template over the nominated target to line up with the point.

Any unit (friend or foe) under the template is then subject to an attack roll as normal, using the Strafe and Pinning Fire special rules.

The Black Gnat is a one-shot weapon and each launcher may only fire once per game. Remove the Launcher figures once they have been fired. They do not count as casualties, but play no further part in the battle.

Castellian Exterminator:

Even with the onboard power plant for charging the Goliath cannon, the Castellian still needs all available power to fire the massive weapon and thus must keep manoeuvres to a minimum. The Castellian Exterminator may only fire its Goliath cannon on Suppression Fire or Reactive Stance. It cannot move and shoot.
